

# NODE RED SERVICES

TEAM ID: PNT2022TMID10970

The screenshot displays the Node-RED web interface in a browser. The address bar shows the URL: `node-red-bsdap-2022-11-18.au-syd.mybluemix.net/red/#flow/20ff1dadd97417c9`. The interface includes a top navigation bar with a "Deploy" button and a user profile dropdown for "barathwaj" with a "Logout" option. On the left, a "filter nodes" search bar is present, along with two panels of node categories: "common" and "function". The "common" panel lists nodes like Inject, debug, complete, catch, status, link in, link call, link out, and comment. The "function" panel is currently selected. The main workspace, titled "Flow 1", contains a flow diagram. It starts with a "timestamp" node, followed by an "IBM IoT 1" node (marked as "connected"). This node branches into three "function" nodes. The first "function" node connects to a "Location" node, the second to a "Visibility" node, and the third to a "Temperature" node. A "msg payload" node is also connected to the flow. The bottom of the browser window shows a taskbar with two "WhatsApp Image 2...:jpeg" thumbnails and a "Show all" button.
