Question:

Build a python code, Assume u get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature

PROGRAM

```
Import random
While(True):
    temp=random.randint(10,99)
    humid=random.randint(10,99)
    print("current temperature : ", temp)
    print("current humidity : ", humid,"%")
    temp_ref=60
    humid_ref=45
    if temp>temp_ref and humid<humid_ref:
        print("sound alarm")
    else :
        print("sound off")
    break
```

Schematic Output:

Temp and Humidity.py - C:/Users/kgbar/Temp and Humidity.py (3.8.10)

File Edit Format Run Options Window Help

```python
import random

while(True):
    temp=random.randint(10,99)
    humid=random.randint(10,99)
    print("current temperature:",temp)
    print("current humidity:",humid, "%")
    temp_ref=60
    humid_ref=45
    if temp>temp_ref and humid<humid_ref:
        print("Sound alarm")
    else:
        print("Sound off")
    break
```
